

Kavindya Wickramarachchi

Software Engineering Undergraduate | Frontend Developer

 94 78 757 6616  Email  Gampaha  Kavindya  Kavindya12

Summary

Software Engineering undergraduate with experience in frontend and full-stack development. Skilled in React, TypeScript, JavaScript, API integration and UI implementation. Currently working as a Software Engineer Intern, building responsive web and mobile applications with a focus on user-friendly digital products.

Education

Sri Lanka Technological Campus BSc (Hons) in Software Engineering	2022 - 2026
Diploma in IT & English ESOFT Metro Campus	2019-2020

Experience

- Software Engineer Intern**
VastFactor | Remote
Jan 2026 - Present
- Junior Administrator - Admin & Support**
11th Street Travel UK
Mar 2026 - Present

Skills

- Frontend:** React.js, HTML5, CSS3, Tailwind CSS
- Backend:** Node.js, Express.js, Flask, REST APIs, JWT
- Databases:** PostgreSQL, MongoDB, SQLite, Supabase
- Tools:** Git, GitHub, Postman, Jira, Figma
- Other:** Authentication, Role-Based Access Control, API Integration, UI/UX Design

Certifications

- Fundamentals of Artificial Intelligence (2025)
- Secure MEAN Stack Development (2025)
- Website Development using Python-Flask (2026)
- JavaScript Essentials (Part 1 & 2) (2026)

LEADERSHIP

- Co-Founder & Assistant Secretary
ISACA Student Group - SLTC
2025 - 2026
 - Supported the planning and coordination of student technology and cybersecurity activities.
 - Assisted with event documentation, communication and organizational tasks
- Project Manager - Financial Division
SEDS Project
2024 - 2025
 - Coordinated project-related financial activities and documentation.
 - Worked with team members to organize tasks and deliverables.

Projects

AI-Enhanced EHR System

December 2025 - 2026

Built AI-powered healthcare system using React, Node.js, PostgreSQL, Gemini API. Implemented JWT authentication and role-based access control. Designed UI/UX and integrated AI clinical summarization

Shoopy - MERN E-Commerce Platform

2026

Built full-stack e-commerce platform using MongoDB, Express, React, Node.js. Implemented authentication, cart system, and product management

PresenSync - QR-Based Attendance System

December 2025 - Present

Developed QR-based attendance system using React and Flask. Built dashboards, geofencing, analytics, and reporting features. Implemented secure role-based authentication

Voyra - Travel Platform

2026

Built responsive travel inquiry platform using React and Supabase. Implemented search, filtering, and inquiry system

VOrbito - AI Collaborative Project Management

2026

AI-powered project management platform for team collaboration and task tracking. Built with React, TypeScript, Express, Prisma and Socket.IO. Developed Kanban boards, real-time updates, role-based access and analytics.
